

# SEO, AEO and GEO for businesses in Ahmedabad and across India

I help local and growing businesses get found on Google, on Google Maps, and inside AI answers like ChatGPT and Google AI Overviews. 2.5 years of experience.

## WHAT I DO

- **Local SEO**  
Google Business Profile, Maps ranking, citations and reviews, so nearby customers find you.
- **SEO**  
Technical audits, keyword research, on-page fixes and content that ranks.
- **AEO and GEO**  
Content and schema shaped so Google and AI tools show your business as the answer.
- **Websites**  
Fast, mobile-first sites with clean code and structured data.
- **AI automation**  
AI tools and workflows that take repeat work off your team.

## HOW I WORK

- 01 Audit** I check what is holding the site back and list the fixes, biggest first.
- 02 Plan** You get a short roadmap: what happens, in what order, and what will be measured.
- 03 Build** Technical fixes, new and updated pages, and structured data.
- 04 Report** Plain reports from Search Console and Google Analytics 4.

## INDUSTRIES I HAVE WORKED WITH

Hospitals and clinics

Plumbing

Pest control

HVAC

Law firms

E-commerce

Marketing agencies

## TOOLS

Google Analytics 4 (GA4), Google Search Console, SEMrush, Ahrefs, Screaming Frog, PageSpeed Insights, Google Tag Manager, WordPress

## IN NUMBERS
